The metal in them, from the iron casting to the smallest piece, is of poor quality. Their makers have not the means to do their work well. They are hid away in secret places, where it would be impossible to have at their command the proper mec anical appliances. It is only by doing a great husiness, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The boat designed machines, BADLY MADE, are always liable to get out of order, and are sure to coat considerable trouble and money to keep them in repair.

The qualities to be looked for in a machine are: The qualities to be looked for in a machine are: certainty of correct action at all roles of speed, simplicity of construction, great durability, and rapidity of operation, with the least labor. Machines to combine those essential qualities, must be made of the best metod and finished to perfection. We have the ways and means, on a grand scale, to do this.

The purchasers of Machines, whose daily bread it may concern, will find that these having the above qualities not only work well at rapid as well as slow rates of speed, but least long in the finest possible working order. Our machines, as mode by us, will carn more money with less labor than any others, whether in imitation of ours or not. In fact, they are cheaper than any other machines as a gift.

FAMILY SEWING MACHINES are valuable in proportion to the number of things they can do well. See what ours can do before making a purchase. There is no doubt as to the value of our Machines for manufacturing purposes, but it is only of late that the public began to learn that the exential elements of a machine best adapted to the heaviest work, would also be the elements to be embedied in a Family Machine. It is now well understood that our Letter A Machine is the only Family Machine yet offered to the public which has simplicity, rapidity, durability, and estrainty of correct action. While as a general thing, the sewing-machine people are candid enough to acknowledge that our machines are unequaled for manufacturing purposes, they are almost sure to assert, in the same breath, that Singer's Letter A, or Family Machine, are not as good as theirs!
